**If you have a material handling problem...**

### **Complete Solutions to Fit Your Needs**

Ergonomic Solutions specializes in the moving, storing, and manipulating of products, raw and finished. We are system integrators providing turnkey solutions to your material handling needs whether it's engineering, product sales, integration, installation, service after the sale, or custom solutions, ESi is committed to meeting your unique needs.

### **Cranes, Robots and Everything In Between**

Ergonomic Solutions sells, installs, inspects, and maintains a vast range of material handling products. We are your one-stop-shop for all your material handling needs. We provide cranes, hoists, robots, conveyors, mezzanines, lifts, in-plant offices, cabinets, bins, shelving, and more. Our mission is to make your workplace safer, more efficient, and more productive.

### **Concept Design to Project Management**

Ergonomic Solutions uses an integrated approach to offer complete concept design and project management services. Every customer's problem is different and solutions aren't always one-size-fits-all. ESi will work with you to develop the best solution for your material handling needs.

**solutions**

...We have the solution.

## Installations

Our professional crews are available for installations in the most challenging situations. Ergonomic Solutions experienced team of experts can handle any job, whether it's a single component or the largest, most complex material handling system installation. Our vast expertise covers virtually every material handling application. Our years of experience with installation makes us one of the most qualified installers in the Midwest.

## OSHA Inspections

Protect the safety of your people and prevent potential serious liability issues by performing all required and recommended inspections. Ergonomic Solutions can efficiently perform certified load tests on equipment from 1/4 ton to over 100 tons. We will inform you on any deficient conditions and advise you on a plan for repair and/or replacement.

## Satisfied Customers

"ESi has been working with me on projects for nine years. They always work hard to engineer the best, most cost-effective solution to meet my needs whether it is a custom design or off-the-shelf. ESi continuously provides the service and solutions to improve our efficiency and safety." - Bart. JCI Engineer
